

We are Civil and Environmental Engineering at Georgia Tech

creative realists who design at the intersection of people, nature and civilization.

global citizens and pragmatic leaders improving the earth at our feet.

entrepreneurs and strategists defining public policy and the future of sustainability.

innovative optimists dedicated to solving problems and improving the human condition.

Since 1898, we are CEEatGT.

Be happy: Engineers have the happiest job in the world, according to recent analysis by The Guardian. It's no wonder – every morning our graduates get to wake up and reshape communities here and abroad.

From tech startups to Fortune 500s, medicine to law, NGOs to multinationals, NASA to NATO, CEEatGT alumni are designing our future and making the world a better place.
